Terminology

NFT — Non-fungible token

STRM — StreamCoin, the primary utility token of the StreamCoin ecosystem

NSTA_602 — NFT Standard Token Agreement_602, StreamCoin's dedicated token standard for minting NFTs

BEP-20 — A token standard on Binance Smart Chain

Stream Chain — The native blockchain for the StreamCoin ecosystem

MetaMask — A software cryptocurrency wallet

STRMNFT Overview & Requirements

STRMNFT is an all-in-one marketplace that allows users to create NFT ownership for their videos and images at an exceptional speed and with low transaction fees. It operates on Stream Chain and utilizes StreamCoin's own NFT standard, NSTA_602, to create NFTs.

The STRMNFT marketplace has a web interface that works with any desktop or mobile device. However, there are some requirements users need to meet in order to benefit from all STRMNFT features:

- A valid email address to register on the marketplace.
- A MetaMask wallet to connect to STRMNFT (Required to mint and buy NFTs).
- A sufficient STRM balance (BEP-20 tokens only) for minting fees (Until July 2022, all NFTs will be minted with zero fees).

Connecting the MetaMask Wallet

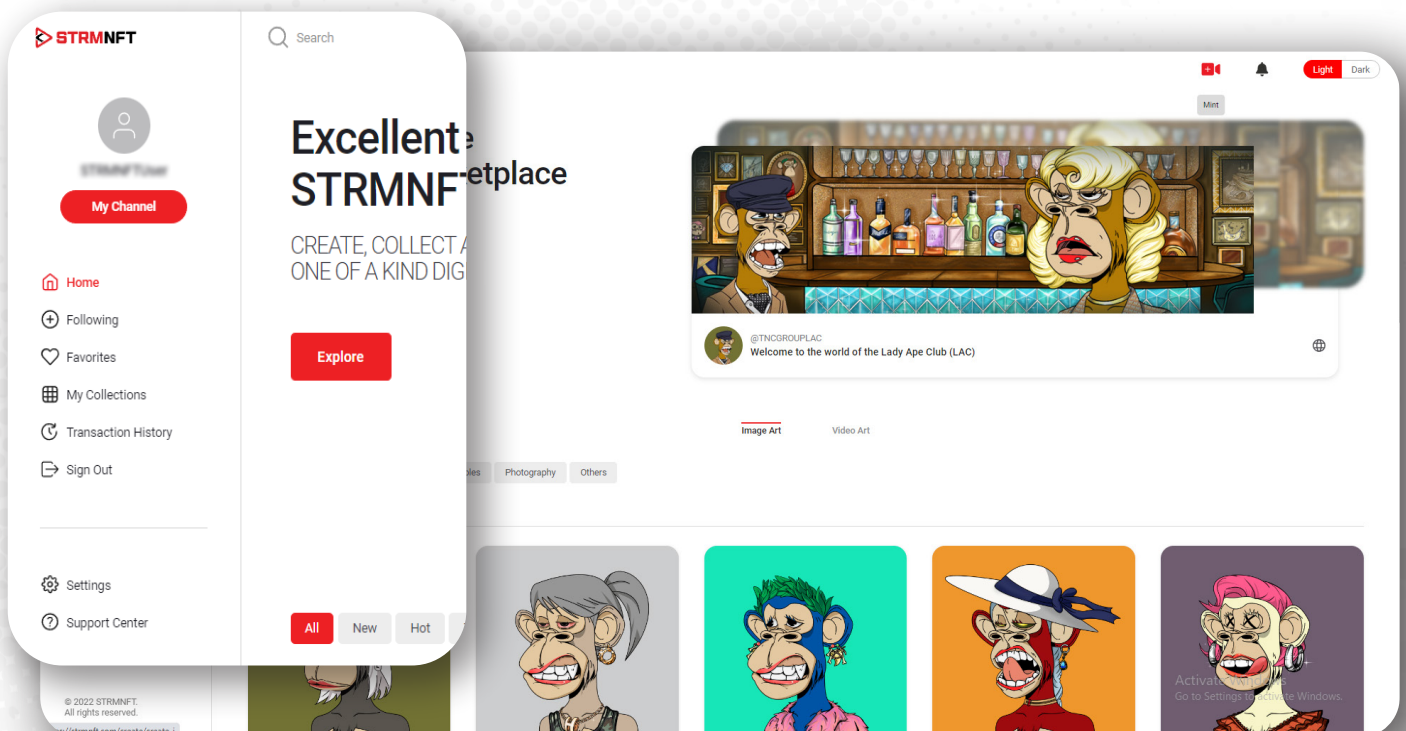

You need to set up MetaMask with the Binance Smart Chain network and the BEP-20 STRM token in order to make transactions on STRMNFT.

If you do not have a MetaMask wallet, you can refer to our guide on how to create one:
<https://medium.com/p/818efefb7c45/>

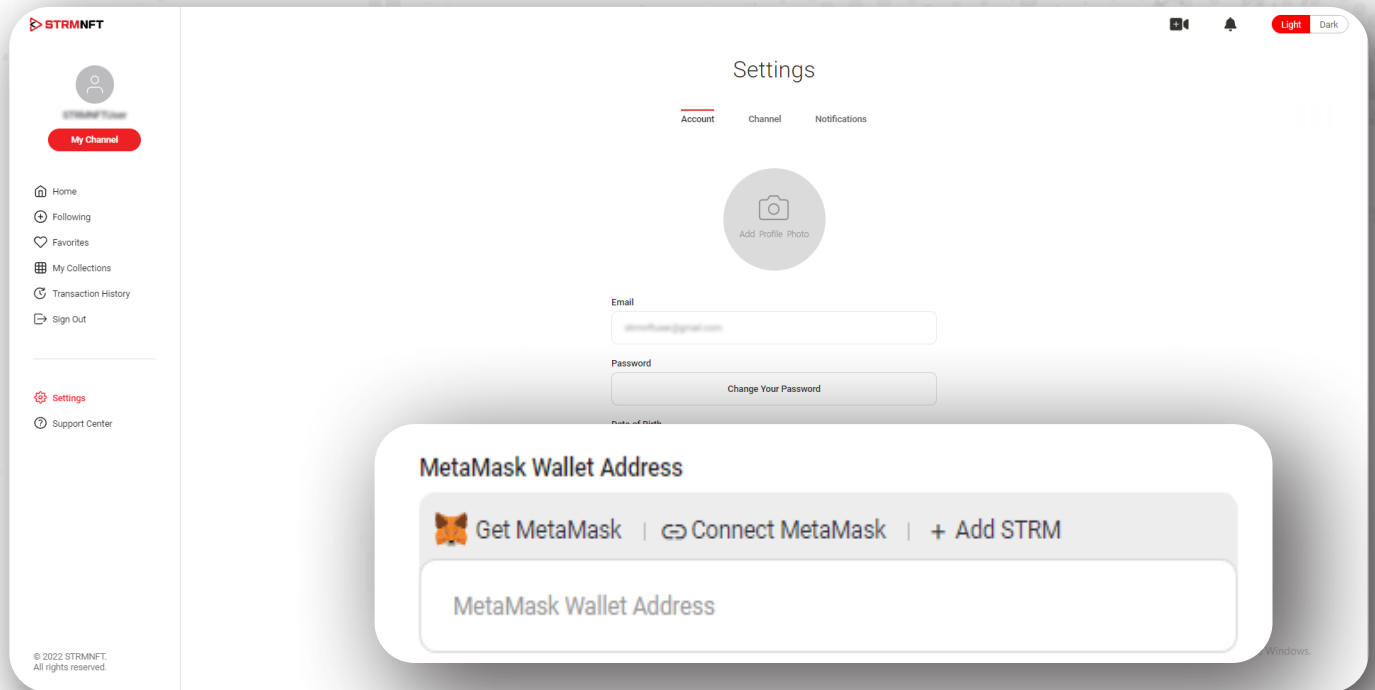

Once your MetaMask wallet is created, you can set it up with STRMNFT and import the STRM token in two ways: Automatically and Manually.

Setting Up MetaMask Automatically

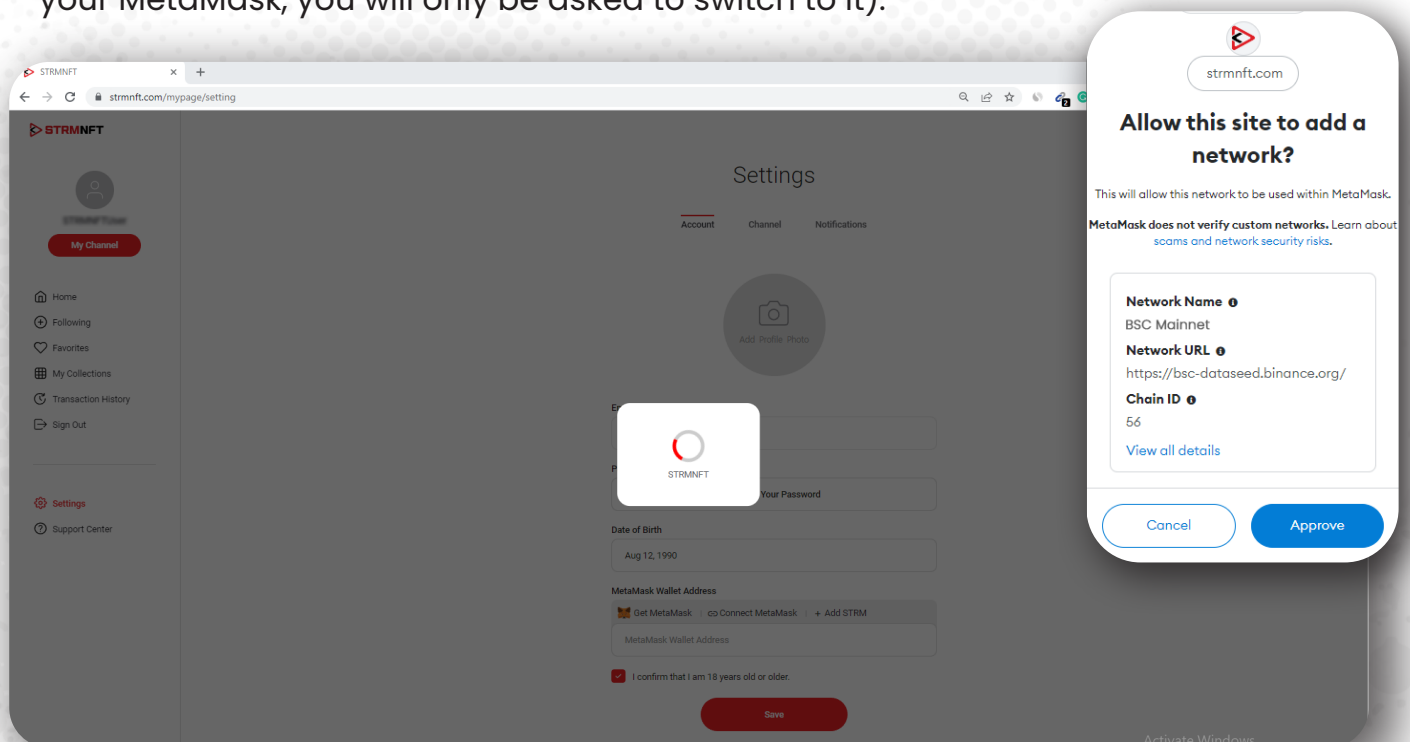

1. Sign in to your account on STRMNFT.
2. Click on **Settings** from the side menu.

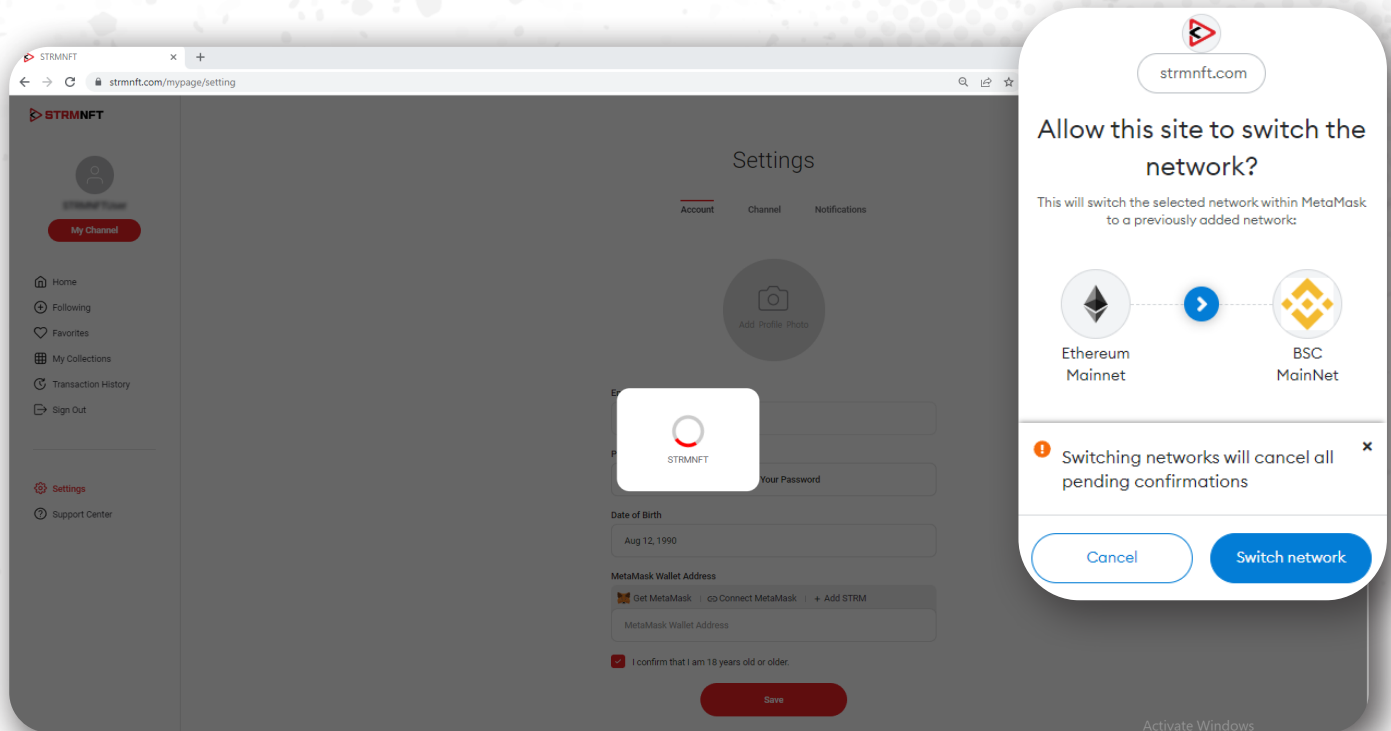

3. Scroll down to the **MetaMask Wallet Address** section and click **Connect MetaMask**.

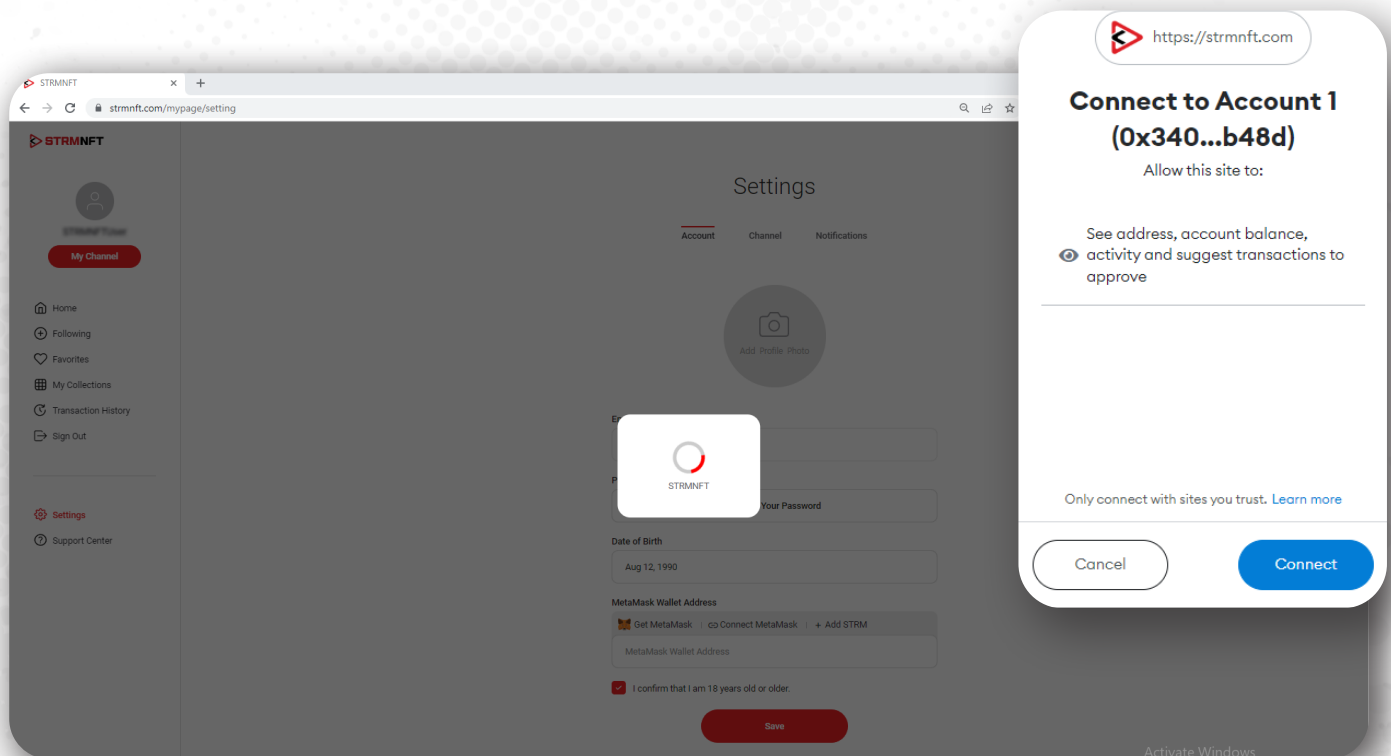

4. The MetaMask wallet will pop up and redirect you to the Binance Smart Chain network*; click **Approve** (If the Binance Smart Chain network is already added to your MetaMask, you will only be asked to switch to it).

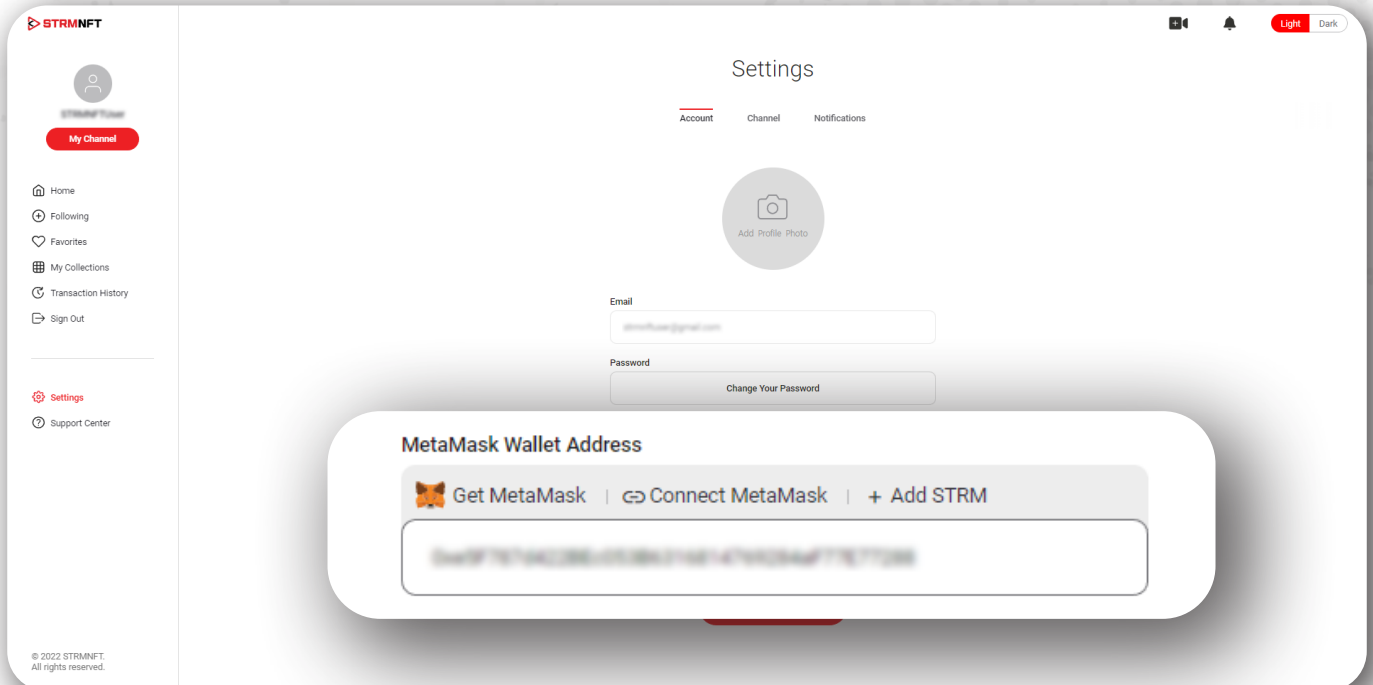

- Click **Switch network** to switch to Binance Smart Chain, and then click **Next** after choosing the MetaMask account you want to use.

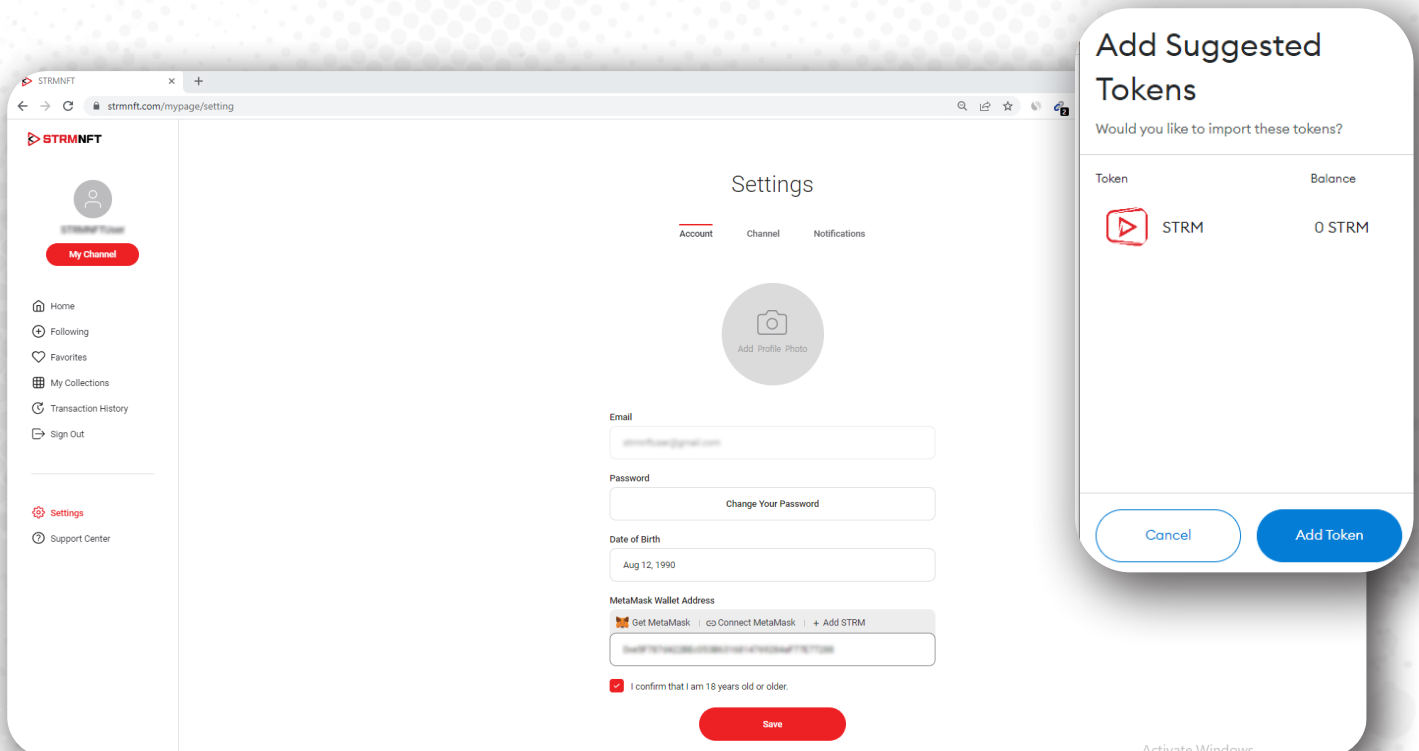

- Click **Connect** to link your wallet with STRMNFT.

7. Once the linking is done, your MetaMask wallet address will be added automatically.

8. To import your STRM tokens, click **Add STRM**, and then **Add Token** on the MetaMask wallet (In case you have the STRM token already added to your MetaMask, you can skip this step).

9. Click **Save** to save your wallet information.

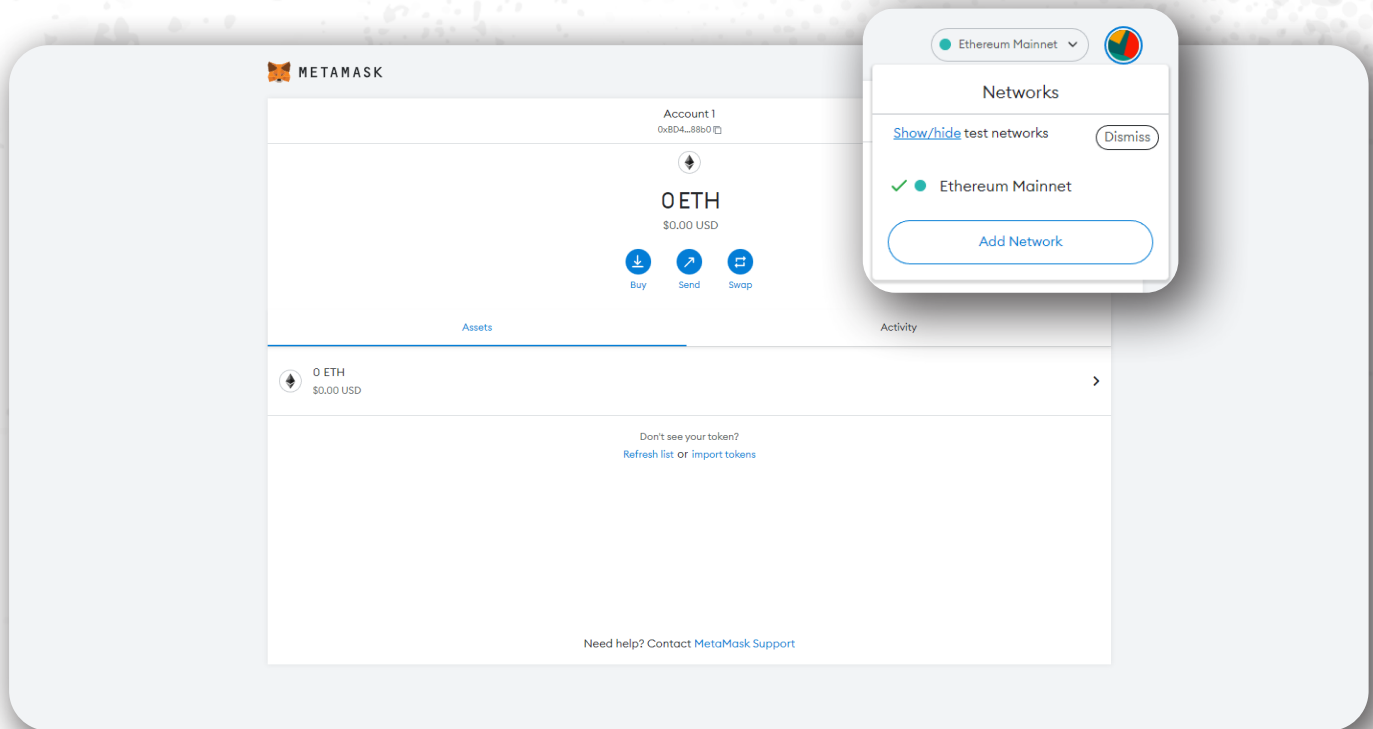

The screenshot shows the STRMNFT 'Settings' page. On the left is a sidebar with a user profile icon, 'My Channel' button, and navigation links: Home, Following, Favorites, My Collections, Transaction History, Sign Out, Settings (highlighted), and Support Center. The main content area is titled 'Settings' and has three tabs: Account (selected), Channel, and Notifications. Under the 'Account' tab, there is a profile photo placeholder with 'Add Profile Photo' text. Below this are form fields for 'Email' (containing 'strmnft@gmail.com'), 'Password' (with a 'Change Your Password' button), and 'Date of Birth' (containing 'Aug 12, 1990'). A section for 'MetaMask Wallet Address' includes links 'Get MetaMask', 'Connect MetaMask', and '+ Add STRM', followed by a 'MetaMask Wallet Address' input field. A large red 'Save' button is at the bottom center. The bottom right corner has a Windows activation notice: 'Activate Windows Go to Settings to activate Windows.'

***Note:** STRMNFT can only be linked with MetaMask using the Binance Smart Chain network. MetaMask cannot be linked with STRMNFT using any other networks like Ethereum, Avalanche, etc.

Setting Up MetaMask Manually

1. Go to the MetaMask wallet browser extension.
2. Open the networks list and click **Add Network**.

3. A new tab will open for you to add the network's details.
4. Fill in the below fields to add the Binance Smart Chain network with the following:

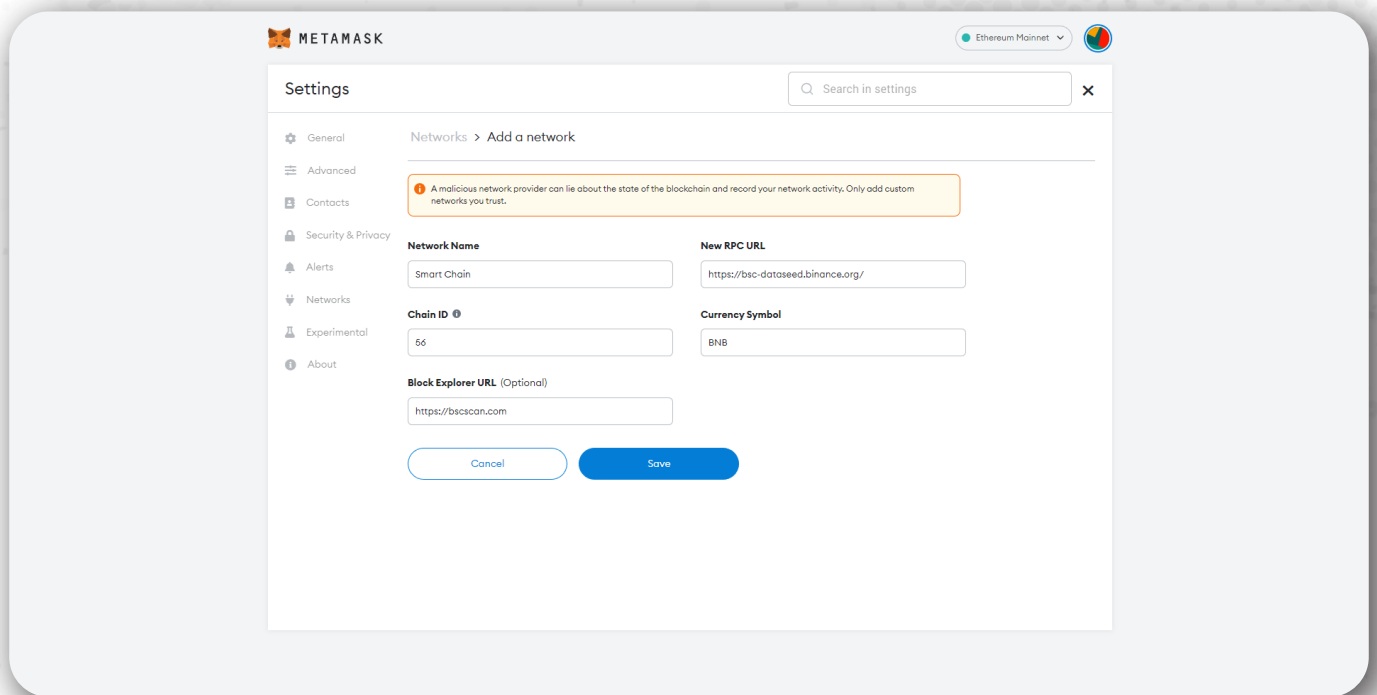

Network Name: Smart Chain

New PRC URL: <https://bsc-dataseed.binance.org/>

Chain ID: 56

Currency Symbol: BNB

Block Explorer URL: <https://bscscan.com>

5. Click **Save** to add the network.
6. In order to connect MetaMask to STRMNFT and import the STRM token, kindly refer to steps 4–8 from the “**Setting Up MetaMask Automatically**” section.
